

SHAHAJAT NURANI

Full Stack Developer

Profile

I'm studying software engineering.

I like to do something different then others do, I work with passion because I love to code and believe that this is the best job in planet what can make human life more comfortable and easy.

I have developed E-Commerce Website Like Amazon using reactjs and mongo DB.

also have some others Web development frontend and backend project on my GitHub.

also work on some local project potential skill.

Employment History

Full Stack Developer at A.I.T. Dream Project

01-02-2020

I'm still working on this online company.

and I have done 2 major project by myself.

1. I made a fully functional online shopping website using Woo Commerce and Elementor plugin.
2. I made movie download website using Blogger template and have done CEO for these website.

Education

Software Engineering at Hubei University Of Technology , Wuhan Hubei China

12-09-2019

I have been studying here for last 2 years and working on some programming project of my own faculty.

I also made a smart home automation project to experiment myself as a programmer and it works .

also made virtual assistant using Python3 and I'm using this virtual assistant as like google assistant.
